Name of Offeror or Contractor: GM GDLS DEFENSE GROUP L.L.C.		

- SECTION A - SUPPLEMENTAL INFORMATION
1. This is a bilateral modification P00008, to Attachment 1, titled IAV Performance Specification at Initial Delivery, contract DAAE07-00-D-M051.
 2. Paragraph 3.1.1.9 Painting. Effective with the 150th IAV vehicle delivered to the Government and delineated as follows:ICV 0001-0076; CV0001-0021; MCV0001-0043; NBCRV0001-0004; RV0001-0005, the following specifications are incorporated into into the contract. Specification MIL-T-704 (Treatment and Painting of Material) is replaced with MIL-C-53072. The procedures in MIL-C-53072 shall be adhered to with the exception of the application of hexavalent chromium based pre-treatment on high hard steel in excess of Rockwell C-40. The contractor shall use either zinc phosphate based pre-treatments or in lieu of this, the contractor shall blast Ballistic Steel (a surface finish profile 1.0 to 3.0 thousandths of an inch) and prime the surface within six hours or for non-Ballistic High Hard Steel the contractor shall clean the surface in accordance with MIL-C-53072. The contractor may propose an alternate cleaning method in accordance with MIL-C-53072. The contractor shall notify the Government in advance if an alternate cleaning method is proposed. If primer is not applied within the specified time limit, the contractor shall apply a chemical wash KLEENINHIB 486 or equivalent to prevent flash rust prior to the application of primer. The contractor shall remove rust inhibitor, KLEENINHIB 486 or equivalent, from the vehicle prior to application of primer. The contractor shall establish and demonstrate a quality control process that validates/ensures paint adhesion. Whenever practicable, the contractor may incorporate the aforementioned procedure at sooner vehicle effective points than those stated above.
 3. Effective with the 150th IAV vehicle delivered to the Government and delineated as followsICV 0001-0076; CV0001-0021; MCV0001-0043; NBCRV0001-0004; RV0001-0005, the following specifications are incorporated into the contract. The contractor shall not utilize hexavalent chromium in the pretreatment process for aluminum. The contractor shall instead use commercially acceptable alternatives to pre-treat aluminum, which include but are not limited to; Oxsilan - AL-0500; Alodine 5200; and Alodine 5700. Anodizing per MIL-A-8625 is permissible providing Type I and IB are not utilized since these incorporate hexavalent chromium. The contractor must use alternative non-chrome sealers as discussed in para 3.8 of MIL-A-8625. Anodized components which will subsequently be painted shall use nickel or cobalt acetate based sealer. For components which are anodized and not subsequently painted the recommended sealer is EnviroSeal 2500 or an equivalent. Whenever practicable, the contractor may incorporate the aforementioned procedure at sooner vehilce effective points than those stated above. Aluminum components requiring electrical conductivity, shall be treated in accordance with MIL-C-5541 Class 3.
 4. The Government invites the contractor to offer for consideration any other alternatives to MIL-C-5541, in addition to Oxsilan - AL0500; Alodine 5200; and Alodine 5700 that meet IAV performance requirements. The Government invites the contractor to offer for consideration any other alternatives to MIL-C-53072 in the area of pretreating non Ballistic High Hard Steel.
 5. If the contractor for any reason believes that hexavalent chromium based pre-treatment materials are the only acceptable substance with no known alternatives, then the contractor shall seek Government approval in accordance with C.3.10 and C.5.13 of the contract. The Government will consider waivers in these situations as required. Under no circumstances will hexavalent chromium be used without prior Government approval.
 6. The above specifications are applicable to all IAV's ordered against this requirements contract following delivery of the 150th vehicle (ICV 0001-0076; CV0001-0021; MCV0001-0043; NBCRV0001-0004; RV0001-0005).
 7. Above changes are incorporated into the contract at no adjustment to contract price.
 8. All other terms and conditions remain in full force and effect.
